MMMonVHF Newsletter No. 20/ WEEK 20 2014

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2014-05-15
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

*** 144 MHz Sporadic E season 2014 ***

Call for reports

In 2 to 3 weeks from now, we might have the first Sporadic E openings on
144 MHz. With the tools we have now, it must be possible to detect
Sporadic E faster than ever. 50 MHz and 70 Mhz will be good indicators for
144 MHz Sporadic E; be aware of very short skip on these bands and make spots
on the cluster eg. 16:19 PA4EME IT9XXX JO20WXJM68XX. Mark the indicator between
the locators! Special software like LiveMUF will extract data and will be
able to indicate 144 MHz Sporadic E before you have noticed yourself!
LiveMUF software is developed by Dave Edwards, G7RAU, and can be found on his webpage:
LiveMUF. There you will also find the do's and don'ts about spotting Sporadic E.

Also in 2014 we like to invite you to send your Sporadic E logs to MMMonVHF. We will try
to have them online as soon as possible. Be aware that this is not an automatic process
so it takes time to see your log show up in the list. No need to send it twice the same
day! Please check the MMMonVHF forum about the best way to send your log and which format
to use. As the editors also have to work for a living, they will not be able to edit all
logs real time. We will do so if we can and often we can publish the logs "in between"
during QRL-hours. Creating of the maps is a different story as not every log is in the
correct format. So the logs that are in the right format can be processed quickly...the
one's that are not will have to wait. Most made errors are wrong locators, wrong time
stamps and unnecessary writing between the QSO lines. Every year we find stations that
are located in the water or in Africa. It would be very helpfull if you did a primary
check yourself of the locator..the databases from eg. ON4KST, MMMonVHF, QRZ.com can help you.
Also double check the date on the form that is used to send log via the ES summery pages
and not to mention the : in the time stamp.

Please note that we will only publish QSO's made on 144 MHz.

The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USERS of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USERS who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/contact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!
